PROJECTS

DevOps Case Studies:

- **CI/CD through Jenkins** – We created EC2 instance for the Jenkins and tomcat. We configured both tomcat and Jenkins. Using the git repository we fetched the html file and deployed it in the Jenkins server using an IPV4 address.

- **Ansible configurations in AWS** – We have created two instances for server and clients . We connected both ansible server and client and worked on it.

- **CI/CD through Containers (Docker)** – Here we created a instance for docker and installed the docker and then deployed the container using Jenkins.
